PATIENT CARE

PATIENT CARE

WARRANTY

At PBO Group, we are committed to ensuring that all client devices and supports are of the highest quality materials, well fit and built to last. We believe in our products and offer the following warranties from the date of final fit.

CUSTOM-MADE DEVICES

Assuming normal usage, all custom-made devices are warrantied against defects for 6 months. Fit and function for these devices is warrantied for three months after final fit, with the exception of cases of significant changes in weight.

CUSTOM-MADE PAEDIATRIC DEVICES

Assuming normal usage, paediatric devices are warrantied against defects for two months. Fit and function for these devices is warrantied for one month.

SOFT SUPPORTS, PRE-MADE DEVICES, SHOES, COSMETIC ELEMENTS AND CONSUMABLES

These items are solely covered by the warranty provided by the original manufacturer.

MANUFACTURER WARRANTIES

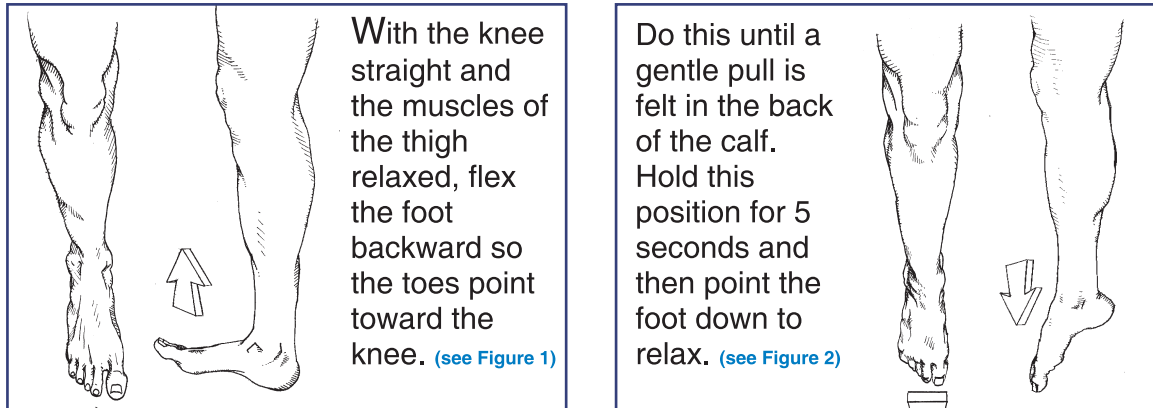

PBO Group also supports manufacturer's warranties to componentry. The client is responsible for the cost of shipping and/or related labour.

Please note that the Ministry of Health (ADP) does not contribute to the costs of repairs under any circumstance.

LET'S WORK TOGETHER

To maximize the success and longevity of your device, please notify us immediately of any problems, visit us annually for maintenance and never attempt to modify a device yourself.

CALF STRETCH

PERFORM THIS SIMPLE STRETCH WHILE:

- Lying in or sitting on your bed
- Sitting in a chair with your leg supported by a stool
- Relaxing on the couch

STEP 1: Begin with your knee straight and your thigh muscles relaxed.

STEP 2: Flex your foot forward, so your toes point toward your knee.

STEP 3: Continue flexing your foot until you can feel a gentle pull in the back of your calf.

STEP 4: Hold this position for 5 seconds, then, point your foot down to relax.

CONDITIONS

DROP FOOT

WHAT IS DROP FOOT?

Drop Foot is a general term used to describe the inability to lift the front of the foot off the ground. If you have drop foot, you may drag the front of your foot on the ground when you walk and/or compensate for your weakness. This can result in back, hip or knee pain.

Drop Foot is a sign of an underlying neurological, muscular or anatomical problem. It can be temporary or permanent, depending on the underlying condition.

HOW IS DROP FOOT TREATED?

Treatment for Drop Foot can help decrease pain and improve balance and can include:

- An Ankle Foot Orthosis (AFO) that goes inside the shoe along the length of the foot and up the back of the calf. The AFO prevents the foot from dropping and provides ankle support during ambulation. This method can help reduce the risk of falling.
- Muscle stimulation is a newer treatment method for Drop Foot. Electrodes are specifically placed on the muscle to transmit an electrical signal to stimulate a muscular contraction to pick the foot up.

IS THERE FUNDING AVAILABLE FOR DROP FOOT TREATMENT?

- The Ministry of Health's Assistive Devices Program (ADP) is a funding program that will provide up to 75% of the cost of a custom Ankle Foot Orthosis. The client and/or their supplementary insurance program covers the remaining 25%. If you are on ODSP, OW or ACSD, ADP will pay up to 100% of the approved Ankle Foot Orthosis cost.
- Health benefit programs will cover their approved amount for custom Ankle Foot Orthosis or muscle stimulation.

PERIPHERAL NEUROPATHY

WHAT IS PERIPHERAL NEUROPATHY?

Peripheral Neuropathy is a condition that occurs as a result of damage to the peripheral nervous system. This damage distorts and/or interrupts signals between the brain and the rest of the body, most commonly in the extremities.

WHAT ARE THE SYMPTOMS OF PERIPHERAL NEUROPATHY?

SYMPTOMS OF PERIPHERAL NEUROPATHY CAN INCLUDE:

- Numbness, tingling and prickling sensations
- Sensitivity to touch
- Muscle weakness
- Lack of sensation or pain

IN MORE EXTREME CASES SYMPTOMS CAN INCLUDE:

- Burning pain
- Muscle wasting
- Paralysis
- Organ and gland dysfunction

HOW IS PERIPHERAL NEUROPATHY TREATED?

Treatment for Peripheral Neuropathy can include:

- Bracing and supports to help reduce the pain, minimize the impact of physical disability and protect insensate body parts by:
 - Compensating for muscle weakness
 - Alleviating nerve compression
 - Cushioning insensate areas
 - Supporting unstable joints

CONDITIONS

POSTERIOR TIBIA TENDON DYSFUNCTION (PTTD)

WHAT IS POSTERIOR TIBIA TENDON DYSFUNCTION (PTTD)?

Posterior Tibia Tendon Dysfunction is the most common type of flatfoot that develops during adulthood. It is often referred to as "adult acquired flatfoot." It typically occurs in just one foot, but some people may develop it in both. PTTD is usually progressive, which means it will continue to get worse, especially if it isn't treated in the early stages.

WHAT CAUSES PTTD?

PTTD is often caused by the overuse of the posterior tibial tendon. Symptoms usually occur after activities that involve that tendon, such as running, walking, hiking or climbing stairs.

WHAT ARE THE SYMPTOMS OF PTTD?

SYMPTOMS OF PTTD GET WORSE AS THE CONDITION PROGRESSES AND CAN INCLUDE:

- Pain along the inside of the ankle
- Swelling
- Flattening of the arch
- Inward rolling of the ankle

HOW IS PTTD TREATED?

TREATMENT FOR PTTD CAN INCLUDE:

- Orthotic devices or bracing
- Immobilization
- Physical therapy
- Medications
- Shoe modifications
- Surgery

CHARCOT'S JOINT

WHAT IS CHARCOT'S JOINT?

Charcot's Joint, also known as Charcot's Foot and Charcot's Disease, is a progressive destruction of a joint, most commonly the foot and ankle. It develops in people who cannot sense pain and are unaware of the early signs of an injury. People with diabetes and spinal cord injuries are especially at risk. Damage to the foot and ankle can occur unknowingly and gradually over the years and then rapidly progresses with permanent deformity resulting in just a few weeks.

WHAT ARE THE SYMPTOMS OF CHARCOT'S JOINT?

Early stage symptoms include:

- Joint stiffness
- One foot/ankle warmer than the other

Later stage symptoms include:

- Pain, sometimes extreme
- Deformity and collapse of the arch of the foot
- Ulcers over deformed bones, possibly leading to infection and amputation

Preventing Charcot's joint from progressing into later stage symptoms is very important to help avoid foot deformities that can result in regular shoes no longer fitting.

HOW IS CHARCOT'S JOINT TREATED?

The healing process for Charcot's Joint can take between one and two years and requires a lifetime of professional footcare. Early stage treatment includes:

- Use of a wheelchair, walker, crutches or cane for 3-6 months (or longer) to reduce weight and/or immobilize the foot/ankle

The second stage of treatment involves:

- Use of appropriate footwear, custom foot orthotics and/or bracing to protect the foot/ankle

FUNDING

OVERVIEW

PBO Group works closely with our clients to assess their needs and support them in exploring all available funding opportunities.

PBO GROUP HAS BILLING PRIVILEGES WITH THE FOLLOWING FUNDING SOURCES:

- Assistive Devices Program (ADP)
- Workers Safety Insurance Board (WSIB)
- Department of Veterans Affairs (DVA)
- Non Insured Health Benefits For First Nations and Inuit (NIHB)
- Ontario Disability Support Program (ODSP)
- Ontario Works (OW)
- Assistance for Children with Severe Disabilities (ACSD)
- War Amps of Canada
- Champs Program
- March of Dimes
- Easter Seals
- Private Health Insurance Plans

If you have any questions about accessing additional funding for your devices, the PBO team is here to help you.

FUNDING

ASSISTIVE DEVICES PROGRAM (ADP) FUNDING

WHO QUALIFIES FOR ASSISTIVE DEVICES PROGRAM (ADP) FUNDING?

Any permanent resident of Ontario with a valid health card and a long-term physical disability that requires an aid for six months or longer can apply for Assistive Devices Program (ADP) Funding.

WHICH AIDS QUALIFY FOR ASSISTIVE DEVICES PROGRAM (ADP) FUNDING?

- Braces
- Prosthetic limbs
- Lymphedema compression garments

HOW MUCH FUNDING WILL ADP CONTRIBUTE TOWARD MY DEVICE?

ADP will pay up to 75% of the approved price. You or your supplementary health insurance company will be charged for the remaining 25%, as well as any additional components or procedures not covered by ADP. In some cases, other government or charitable funding may be available. If you receive social assistance benefits from OW, ODSP or ACSD, ADP may pay up to 100% of the approved price.

HOW DO I APPLY FOR ADP FUNDING?

The first step is to consult with an approved ADP authorizer or provider, like any of our PBO Group locations and complete the appropriate application form.

For additional information on the ADP program, contact the PBO Group or:

Ministry of Health and Long-term Care

Tel. 1.800.268.6021
